

Online Ordering fully integrated with your ICG POS

## Special Features

- Flexible hosted or licensed software options.
- Automated market mapping of delivery zones.
- Status of Orders at location level
- Pricing and taxes dynamically pulled from POS.

## Online Ordering Module

A significant opportunity for the restaurant industry! Consumers want the ease and convenience of ordering takeout, delivery and catering from their favorite restaurants – anytime, anywhere. Sequential Soft provides everything you need to seamlessly take your business online and capitalize on the off-premise opportunity.

Our custom-branded online ordering sites seamlessly integrate within your existing infrastructure, enabling you to run your restaurants more efficiently, serve customers more effectively, and drive off-premise sales. Our online ordering system is built upon our enterprise class platform featuring real-time POS integration, self-sufficiency in configuring to your restaurant operations, and a central database for a single view of customers across ordering channels.

## Key Features

- Dynamic graphical promotion of items
- Streamlined, intuitive "wizard-like" interface
- Browse menu viewing option before logging in
- Simplified menu item customization and special requests
- Administrative panel for management of menu items
- Intuitive delivery address or pickup location selection
- Customer profile information always one click away
- Complete visibility of customer's order history
- Confirmation by Email
- Recall previous orders
- Future orders management
- Send orders directly to the Bar / Kitchen Printers of the appropriate outlet.
